Washington, March 16.—The dissolution of the "Standard Oil" is now a
question for the supreme court of the
United States alone. The final argument of the famous suit to dissolve
the Standard Oil company of New
Jersey, as a conspiracy and a monopoil in violation of the Sherman antitrust law, was made today and the
court took the matter under consideration.

He paid his compliments to Frank B. Kellogs, author of the petition of the government, filed in the circuit court of the United States for the eastern district of Missouri, and on which the decree of dissolution before the court for review, was based. Mr. Johnson told the court it reminded him of the contents of the witches' caldron in Macbeth, in that it appeared to have been made up of a collection from the scrap books of disappointed oil producers and "magazinists—female or otherwise."

The best part about it, he told the court, was that it ended with a prayer.

Standard Oil's Past Contained a National Scandal.

It fell to Attorney General Wickersham, on the side of the government, and John G. Johnson, for the defense, to make the closing remarks. In addition, D. T. Watson, another Standard Oil counsel, addressed the court earlier in the day.

### LIBERAL CONCESSIONS MADE BY BOTH SIDES. There Will Be Ne Strike on N. Y. C. and Its Controlled Lines.

New York, March 16.—The New York Central and Hudson River railtood and its controlled lines, including the Lake Shore and Michigan Southern, Michigan Central, Boston and Albany and Big Four, reached a tacit understanding this evening after an all-day conference with the Brotherhood of Railway Trainmen and the Grder of Railway Conductors that there shall be no strike because of the lack of concessions. In the negotiations for an increase in wages and changes in the working schedules both sides were in the best of humor and joined in a statement that there was not the least likelihood of a strike. The result of the conference, it was said, would mean a minimum increase to the United States postoffice. North of

The threatened strike of the firemen on the western lines has greatly confused the situation here. The conductors and trainmen hoped to have their difficulties settled before the firemen presented their demands.

Demands for a new working schedule and increased pay will be made jointly by the conductors and trainmen in a few days on the Erle and the Central Railroad of New Jersey. The Pennsylvania is already paying more than the uniform demands of the men and the uniform demands of the men and that system will probably escape negotiations. President W. G. Lee of the trainmen and President A. B. Garretson of the conductors will go to New Haven, Conn., in a day or two to canvass the strike vote now being taken by men on the New York, New Haven and Hartford. They will be accompanied by the five vice presidents of each of the two national orders now in this city. The grand councils of both unions held a preliminary conference in the city today.

Macon, Ga., March 16.—Within two blocks of the City hall and in one of the most fashionable residence sections of Macon, an attempt at criminal as-sault was made tonight upon Mrs. J. C. Hanberry a young matron, who, with her husband, are boarders at the home of Dr. W. A. Cleveland on Wash-

home of Dr. W. A. Cleveland on Washington avenue.

Mrs. Hanberry was alone in a room in the rear of the house when her assailant a young white man, suddenly jerked open a window blind and attacked the woman. Mrs. Hanberry succeeded in freeing herself from the grasp of her assailant. Several occupants of the house were attracted by the worfian's screams and hurried to her assistance only to see the departing form of the intruder.

The young woman was prostrated by the shock, but was otherwise uninjured.

A description of the man given the police tallies so completely with that given of the assailant of Miss Louise Weigs Monday night that officers are led to believe that the man who attacked Mrz. Hanberry is the same person.

Pinkus is a noted chemist, and after a minute analysis declares that the work is a composition of lac, spermaceti and beeswax. Spermaceti, the chemist says, was not known prior to 1700, from which he concludes that the bust could not have belonged to the period claimed by those who sold it to 12. Bode. He also asserts that the English sculptor Lucas always used a mixture of spermaceti and lac in modeling, and that in all probability he was the author of the work, as has been maintained by those who attacked its genuineness.
